

Psychodrama Online: playing together

New Play Date!

July 12th 2021 from 14-17 (CEST)

Strengthen your professionalism with Psychodrama by participating in this fun gathering. A collaboration between Hannah Salomé, Jacomien Ilbrink and Ina Hogenboom.

Psychodrama online is an addition to your work with Psychodrama as contact-oriented work through the screen.

In recent times, video calling communication has increasingly become another way of working and is used in various forms of guidance, therapy and coaching.

The challenge has been to work online capturing the richness of Psychodrama. Using all the technical tools available, this became increasingly better. In the past year, we gained a lot of experience with this new way of working, that we very much like to share with others!

Indeed: we work from the basic principles of Psychodrama of spontaneity and creativity (finding new answers to old situations and adequate answers to new situations)!

During this play date we will use computer techniques and skills you need working with psychodrama online. Participants gain experience with exercises, in which the various roles as protagonist, group member, antagonist (auxiliary ego) and director.

Goal is to increase your skills as a psychodrama director online as well as connect and have fun together! However, as always in psychodrama: the play date will be tailored to the needs of the participants.

Next play date is 12th of July 2021 from 14-17 CET

Fee: € 50

(Note: We have special arrangements for PAfE members).
